Temporary Notice to Mariners

NAVIGATIONAL HAZARD Seagrass Wrack Accretion Port Geographe Harbour Entrance Channel

Mariners are advised that, due to the accretion of moving seagrass wrack, some areas of the Port Geographe harbour entrance channel have shallowed significantly.

The affected area includes the full extent of the entrance channel as defined by the rock breakwaters. There is a moving seagrass wrack layer in this area which may vary significantly in thickness and position over short time frames.

Further details may be obtained by contacting the Department of Transport on T. 9216 8018.

Mariners are advised to navigate with extreme caution, allowing for the changing sea bed conditions, and to consider local tidal variations when traversing this area.
